

## Installation tips

Please don't tighten the screws completely and go back later for a final tightening of all the screws after pieces are aligned with each other .

Lay a mat or old blanket out to assemble onto so the floor and the furniture doesn't get scratched or damaged during building.

## Ready To Use

**Before Plugging the table into the outlet, make sure that**

- The lift columns are level and set at the lowest position.
- All the screws are tightened, to avoid the desk making noise and wobbling.

**Activate the desk by following the next steps.**

- Please press button down and hold for 10-15 seconds until it stutters and beeps.
- Release the button, then your desk is ready to use.

## Operation Guide

### 1. Memory desired height

- Press button "M", display show "S-" with flash.
- Press number and set desired position.

### 2. Advanced Safety feature- lock and unlock the table.

- Press button up and down at same time for 5 seconds, display "LOC"
- All single button will be inactive and table will be unable to move.
- Pressing button up and down together will unlock the keypad and release the LOC

### 3. Reset the table

**When display show Error code or RST, Please reset the table.**

- Unplug the power cord from the control box.
- Unplug the cable that links the keypad to the control box.
- Wait 30 minutes and plug all the cables in again.
- Do the reset: please press button down and hold for 10-15 seconds until it stutters and beeps.

Press by holding  
10-15 seconds

**If the keypad displays HOT, please unplug and replug and let it cool off for a couple of minutes before proceeding again.**
